# *halFILE 4.0 Workstation Installation*

---

Once halFILE 4.0 is installed on the server, the following halFILE 4.0 Workstation Installation can be used to install halFILE on each workstation.

## Install Prerequisites

---

- Microsoft .NET 4 Extended Framework (available from <http://update.halfile.com/>)
- Crystal for Visual Studio 2010 Runtime (available from <http://update.halfile.com/>)
- Imaging Imaging Display Components
  - Imaging 4 (available for purchase from hal Systems or may have been included in your halFILE licensing agreement)
  - Kofax VRS (free download – link on <http://update.halfile.com/> )

## Launch halFILE

---

- Launch halFILE.exe from the halFILE folder on the server
- Answer the prompt to set up a desktop icon

Contact halFILE Technical Support for further assistance.
